Profile

Curious developer with a focus on problem-solving and overcoming technical challenges. Leveraging a multi-disciplinary background to bring a holistic perspective and analytical calm to every project. Committed to transparency, continuous learning, and delivering robust results in fast-moving environments.

Professional Experience

React Developer, Webscope s.r.o., Brno

Jul 2024 - Apr 2026

Project: E-Learning Platform

2026 | **Agile Developer** | + *Claude Skills, Docker*

- Operated within a lean Agile delivery environment, contributing to development cycles with tight feedback loops while prioritizing adaptive planning and high autonomy.

Project: Media intelligence platform

2025 | **Software Engineer** | + *Redux, CodeMirror, Vitest, Cypress, TanStack Query*

- Deployed features validated through rapid prototyping, translating stakeholder requirements into scalable, production-ready code.
- Collaborated within a team directly with clients to gather requirements and deliver regular project status updates.
- Identified and resolved software regressions to improve platform stability and systematically reduce technical debt.

Project: Sponsorship intelligence platform

2024 | **Frontend Engineer** | + *Storybook, Orval, React Hook Form, Zod*

- Developed a **Storybook-driven UI library**, translating design assets into production-ready React components with seamless **REST API integration**.
